C1 Grand Malvern Worldtimer
Owner’s handbook
Time on your side...

Your Christopher Ward watch has been designed and engineered by experts to ensure not only precise timekeeping, but also to give you a sense of pride whenever you wear it.

You’ve made an investment, a good one, and the aim of this handbook is to help you make the most of it during what I hope will be a lifetime of ownership.

Christopher Ward
C1 Grand Malvern Worldtimer

When we announced the C1 Grand Malvern Collection back in 2016, it was always our intention that the JJ Calibre modifications introduced in our C9 dress range would return in updated form. Over the past two years, new interpretations of watches such as the C9 Jumping Hour and Moonphase came to follow, showcasing a more modern dial aesthetic and a new signature case design. Yet one particularly popular JJ Calibre remained conspicuously absent: JJ03, our worldtimer modification.

Good things take time, and in the case of the C1 Grand Malvern Worldtimer, the years of development input by the CW design team have paid off in glorious fashion. For while many of the C1 Grand Malvern models were gentle evolutions of their C9 counterparts, the new C1 Grand Malvern Worldtimer has been born from a nigh-on blank canvas. The root of this change came from a refreshed JJ03, whose mechanical update opened a whole new world of possibilities (excuse the pun) when it came to the C1’s dial design. With a 24-hour GMT disc that now moves in conjunction with the C1’s hands, not only is this the first ‘true’ worldtimer Christopher Ward has designed; it is also one of the most ambitious.

Thanks to the efforts of the technical team in Biel, the C1 Grand Malvern Worldtimer has delivered on those lofty ambitions once again – and all at a price that few worldtimer watches of this quality can rival.
C1 Grand Malvern Worldtimer

Technical information

Features

- Swiss made
- Self-winding 21 jewel movement with ‘JJ03’ in-house worldtimer module
- Unique orange city indicator to highlight chosen timezone
- 40 hour power reserve
- Colimaçoné rotor finish filled with blue lacquer
- Polished surgical-grade stainless steel case with brushed sides
- Blue and white worldtimer dial
- Rotating 24-hour disc with night and day colouring
- International cities ring with curved finish
- Anti-reflective domed sapphire crystal
- Push-down crown with twin flag motif
- Brushed and polished steel hands

- Hour and minute hands filled with T-C1 SuperLumiNova®
- Exhibition backplate with unique engraved serial number

Setting the time/date

1. Manual winding
2. 24-hour disc and city indicator setting
3. Time setting
The crown should sit flush to the case (position 1) in order to maintain water resistance.

- To re-power the watch after a period of non-use, simply wind the crown in a clockwise direction. Your C1 Grand Malvern Worldtimer has a maximum power reserve of 40 hours when fully wound. Normal wearing will allow the rotor to start re-powering the watch over time after putting it on your wrist.

- To set the time pull out the crown gently into position 3. This position is used for handsetting and stopping of the second hand. Turn the crown until you reach the correct time e.g. 10.08 hr. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.

- Move the crown into position 2. To set the 24-hour disc, which moves in individual hour increments, turn in a clockwise direction to rotate the current time to your nearest city location. To set the orange city indicator, turn the crown anti-clockwise until you have reached the desired city.
Setting the 24-hour disc and city indicator

Firstly, you’ll need to set the 24-hour disc to your home city. To do this, pull the crown gently into position 2. Turning it clockwise will activate the 24-hour disc, which moves in individual hour increments. Let’s say, for example, that it’s 4pm in London. You would need to turn the crown until the number 16 on the 24-hour disc is aligned against London on the outer cities ring (figure 1). To set the orange city indicator which highlights your preferred city location, turn the crown anti-clockwise until you have reached the desired city eg. London (figure 2).
How to use the 24-hour disc when you’re travelling

Imagine that you are flying to New York, a city 5 hours behind London on the 24-hour disc – if it is 8pm in London, it would thus be 3pm in New York. Therefore, upon arriving in New York, gently pull the crown out into position 3 to reset the hour and minute hands to 3 o’clock as read against the dial’s outer markers (figure 3).

Once you have set the hands to your new local time, you then need to set the 24-hour disc. Using the crown, find position 2, and turn it clockwise until the number 15 on the 24-hour disc is aligned against New York on the outer cities ring. You can now read the time anywhere in the world at a moment’s glance (figure 4). To set the orange city indicator which highlights your preferred city location, turn the crown anti-clockwise until you have reached the desired city.
Straps and bracelets

As you would expect, we place as much emphasis on the quality of our straps and bracelets as we do our watches. We only use the finest leathers for our straps. The following guidelines explain how easy it is to use and adjust your Christopher Ward strap.

1. Press to release.

2. Pull open the clasp and locate the opening.

3. Thread the strap through the opening to the desired position. Close the clasp.

Leather strap with Bader deployment
Using the quick-release pins on your strap

1. Locate the quick-release pin on your strap. Pull the pin to the side to detach your strap.

2. To reattach your strap, align the pins to the lug holes and click the strap into position. Repeat for the other side.
Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch.

For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under. Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

1 ATM (10 metres)
Safe to wear your watch while washing your hands with tap water.

3 ATM (30 metres)
Washing your car and/or general hose pipe usage.

5 ATM (50 metres)
Water resistant to most household shower units.

15 ATM (150 metres)
Safe to use while snorkelling in open water.

30 ATM (300 metres)
Ideal for experienced divers and those practising scuba-diving.

50 ATM (500 metres)
Professional divers, experiencing prolonged exposure underwater.

100 ATM (1000 metres)
Professional deep sea diving.
Our watch care programme

Your watch is constructed from the finest components and materials available including one of Switzerland’s finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations. It’s for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

60|60 Guarantee

1. 60 Day free returns
Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days to return your watch, absolutely free of charge, and receive a replacement or full refund by return – so long as it has not been worn and is returned in perfect condition.

2. 60 Month movement guarantee
Your watch, at its heart, has a top quality precision engineered Swiss movement – so it’s very unlikely to give you problems with the minimum amount of care and attention, including a regular service. We recommend you return your watch to us every 3/4 years for a service, so our expert technicians can keep your fine timepiece in peak condition.

Servicing and repairs... the Christopher Ward way...

Our innovative approach to servicing and repairing your Christopher Ward watch means that having your watch serviced or repaired doesn’t mean months of waiting followed by an exorbitant bill – which is more or less the experience guaranteed by every other luxury watch brand. We have developed an easy, quick and affordable expert service and repairs programme that doesn’t cost the earth and has your watch back where it belongs – on your wrist – in double-quick time.

Visit our website for more details about our 60|60 Guarantee and Service and Repair Programme.
From small beginnings just a few short years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following for his eponymous watch brand and can justifiably claim to manufacture the most affordable luxury watches in the world.

For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as attractive as the watches themselves, as is the very open approach of the business which means that Chris and the team spend a lot of time communicating personally with our customers – many of whom have become friends.

As the owner of a Christopher Ward watch, if ever you need to get hold of us we are at your service. We have listed some useful contact details on the back cover.

There is also always something new going on at our website at www.christopherward.co.uk and, if you haven’t already discovered the independent forum dedicated to our brand at www.christopherwardforum.com we would recommend a visit. Informative and fun, it’s a great place to hear the unexpurgated view of Christopher Ward.
