Collection

Owner's handbook

**Christopher
Ward**

Time on your side...

Your Christopher Ward watch has been designed and engineered by highly talented craftspeople to ensure not only accurate and precise timekeeping but also to bring a real pride of ownership that only luxury items of the highest quality can ever hope to deliver.

You have made an investment, a good one, and the aim of this handbook is to help you make the most of that investment during what I hope will be a lifetime of ownership.

A handwritten signature in black ink that reads "Chris". The letters are fluid and cursive, with a small dot above the 'i'.

Christopher Ward

Two proudly independent British companies, Christopher Ward and Morgan share a passion for fine British engineering and craftsmanship; both brands have one eye on the past with their elegant, classic designs, and one eye on the future with their cutting edge engineering.

Exclusively designed for Morgan owners past and present, our new three-piece watch collection pays homage to Morgan's most iconic cars – the Aero 8, Classic and 3 Wheeler.

The collection marries Morgan's engineering and design prowess with our own, having been collaboratively created by our Senior Designer, Adrian Buchmann, and Morgan's Head of Design, Jonathan Wells.

"This is more a schoolboy dream than a business partnership for me. To work with Morgan to create watches that celebrate some of the most exciting cars in automotive history? Who knew work could be this much fun!"
Mike France, Co-founder

C1 Morgan Chronometer Collection

Each of the 3 bespoke watches in the C1 Morgan Chronometer Collection has at heart a custom-made version of Christopher Ward's in-house movement, Calibre SH21, hand-built by watchmakers at our atelier in Biel, Switzerland.

C1 Morgan 3 Wheeler Chronometer

Housed in a dynamic and sleek Grand Malvern case, the C1 Morgan 3 Wheeler Chronometer offers a number of visible parallels to the Morgan 3 Wheeler motorcar. It has been designed to echo the bygone aviation era that inspired the 1909 original, whilst also referencing the 21st century technology present in its modern iterations.

C1 Morgan Classic Chronometer

Encapsulating the unique and timeless charm of the Morgan Classic, this timepiece has been sculpted with the car's flowing design in mind. The Grand Malvern-inspired case lines capture the light perfectly, enhancing the understated elegance of the dial and hands. The bespoke finish to our award-winning movement, Calibre SH21, makes this a worthy addition to any Morgan owner's watch collection.

C1 Morgan Aero 8 Chronometer

A car as exciting as the Aero 8 demands an equally exciting timepiece be worn by its owner. The C1 Morgan Aero 8 chronometer perfectly captures the supercar characteristics of the Aero 8 and has a bespoke version of our award winning in-house chronometer, Calibre SH21, at its heart.

C1 Morgan 3 Wheeler Chronometer

Features

- Swiss made
- In-house 27 jewel hand-wound Calibre SH21 chronometer (COSC) with 120 hour power reserve
- Sandblasted black PVD finish to movement with unique skeletonised bridge

Weight:	60g
Calibre:	SH21 hand-wound chronometer with power reserve complication
Case:	316L stainless steel
Water Resistance:	3 ATM (30 metres)
Vibrations:	28,800 per hour (4Hz)
Timing tolerance:	-4/+6 secs per day
Lug to lug:	48.5mm
Strap:	20mm

Setting the time/date

C1 Morgan 3 Wheeler/Aero 8 Chronometer

- The crown should sit flush to the case (position 1) in order to maintain water resistance. Position 1 is also for winding in power. Wind in a clockwise direction to re-power the watch. Your C1 Morgan 3 Wheeler/Aero 8 Chronometer has a maximum power reserve of 120 hours when fully wound.
- For setting the time pull gently into position 2 and turn clockwise to advance the time. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.
- Push the crown back to position 1.

C1 Morgan Classic Chronometer

- Position 1 is for winding in power. Wind in a clockwise direction to re-power the watch. Your C1 Classic Morgan Chronometer has a maximum power reserve of 120 hours when fully wound.
- For rapid date correction pull gently into position 2 and turn in an anti-clockwise direction. **PLEASE NOTE: Date correction should not be carried out between 20.00 hr and 02.00 hr as the watch gearing will already be aligning itself to change the date. The crown should always be pushed in after adjustment, and it is best to do so from position 3 to avoid advancing beyond the desired date.**
- For setting the time pull gently into position 3 and turn clockwise to advance the time. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.
- Push the crown back to position 1. The crown should sit flush to the case in order to maintain water resistance.

Using the quick-release pins on your strap

1. Locate the quick-release pin on your strap.
Pull the pin to the side to detach your strap.

2. To reattach your strap, align the pins to the lug holes and click the strap into position.
Repeat for the other side.

Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch.

For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under. Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

1 ATM (10 metres)

Safe to wear your watch while washing your hands with tap water.

3 ATM (30 metres)

Washing your car and/or general hose pipe usage.

5 ATM (50 metres)

Water resistant to most household shower units.

15 ATM (150 metres)

Safe to use while snorkelling in open water.

30 ATM (300 metres)

Ideal for experienced divers and those practising scuba-diving.

60 ATM (600 metres)

Professional divers, experiencing prolonged exposure underwater.

100 ATM (1000 metres)

Professional deep sea diving.

Our watch care programme

Your watch is constructed from the finest components and materials available including one of Switzerland's finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations. It's for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

Visit our website for more details about our 60|60 Guarantee and Service and Repair Programme.

60|60 Guarantee

1. 60 Day free returns

Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days to return your watch, absolutely free of charge, and receive a replacement or full refund by return – so long as it has not been worn and is returned in box-perfect condition.

2. 60 Month movement guarantee

Your watch, at its heart, has a top quality precision engineered Swiss movement – so it's very unlikely to give you problems with the minimum amount of care and attention, including a regular service. We recommend you return your watch to us every 3/4 years for a service, so our expert technicians can keep your fine timepiece in peak condition.

Servicing and repairs...the Christopher Ward way...

Our innovative approach to servicing and repairing your Christopher Ward watch means that having your watch serviced or repaired doesn't mean months of waiting followed by an exorbitant bill – which is more or less the experience guaranteed by every other luxury watch brand. We have developed an easy, quick and affordable expert service and repairs programme that doesn't cost the earth and has your watch back where it belongs – on your wrist – in double-quick time.

Keeping in touch with Christopher Ward

From small beginnings just a few short years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following for his eponymous watch brand and can justifiably claim to manufacture the most affordable luxury watches in the world.

For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as attractive as the watches themselves, as is the very open approach of the business which means that Chris and the team spend a lot of time communicating personally with our customers – many of whom have become friends.

As the owner of a Christopher Ward watch, if ever you need to get hold of us we are at your service. We have listed some useful contact details on the back cover.

There is also always something new going on at our website at **www.christopherward.co.uk** and, if you haven't already discovered the independent forum dedicated to our brand at **www.christopherwardforum.com** we would recommend a visit. Informative and fun, it's a great place to hear the unexpurgated view of Christopher Ward.
