

C5 Malvern 595

Owner's handbook

 Christopher
Ward

Time on your side...

Your Christopher Ward watch has been designed and engineered by highly talented craftspeople to ensure not only accurate and precise timekeeping but also to bring a real pride of ownership that only luxury items of the highest quality can ever hope to deliver.

You have made an investment, a good one, and the aim of this handbook is to help you make the most of that investment during what I hope will be a lifetime of ownership.

C5 Malvern 595

At Christopher Ward, we enjoy challenging the status quo. Our mission, after all, has remained the same since our very first watch, demonstrating that quality doesn't have to equate to an exorbitant price.

So when the nucleus of an idea formed to make our own ultra-slim watch, the C5 Malvern 595 – part of a genre where thinness of case and final cost seem to work on a scale of inverse proportion - we set ourselves (and our manufacturers) a new challenge.

The result is our thinnest watch yet, although the 595's sleek and graceful case offers no evidence of the hard graft that went into securing its 5.95mm height. Every millimetre counts in the world of ultra-slim watches, and the Swiss-made ETA 7001 played

a crucial part in assisting this, being a hand-wound mechanical movement only 2.5mm tall. Decorated with a Côtes de Genève finish, it takes pride of place through the 595's caseback.

Perfect for all wrists and sizes, the C5 Malvern 595 is a watch that delights in being truly thin, and all at a price that opens the world of ultra-slim watches to the many, not the few.

Technical information

Features

- Swiss made
- 17 jewel hand-wound mechanical movement
- 42 hour power reserve
- Côtes de Genève finish with polished bevel
- 39mm steel case with fully polished sides
- Push-down crown with twin flag motif
- Anti-reflective double curved-top sapphire crystal

- Curved polished black hands
- Snap exhibition case back with engraved serial number
- Italian hand-crafted oak leather quick-release strap with dress buckle or 'Milanese' mesh bracelet
- Luxurious presentation case and owner's handbook

Technical

Diameter:	39mm
Height:	5.95mm
Weight:	33g
Calibre:	ETA 7001
Case:	316L stainless steel
Water Resistance:	3 ATM (30 metres)
Vibrations:	21,600 per hour (3Hz)
Timing tolerance:	±15 secs per day
Lug to lug:	45.8mm
Strap:	20mm

Setting the time/date

1. Manual winding
2. Time setting

The crown should sit flush to the case (position 1) in order to maintain water resistance. To re-power the watch after a period of non-use, simply wind the crown in a clockwise direction

- For setting the time pull gently into position 2 and turn anti-clockwise to advance the time. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.
- Push the crown back to position 1.

PLEASE NOTE: As this watch has a manually wound mechanical movement, take care not to overwind the crown past the point of resistance as it will damage the movement.

Straps and bracelets

Using the quick-release pins on your strap

1. Locate the quick-release pin on your strap.
Pull the pin to the side to detach your strap.

2. To reattach your strap, align the pins to the lug holes and click the strap into position.
Repeat for the other side.

Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch.

For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under. Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

1 ATM (10 metres)

Safe to wear your watch while washing your hands with tap water.

3 ATM (30 metres)

Washing your car and/or general hose pipe usage.

5 ATM (50 metres)

Water resistant to most household shower units.

15 ATM (150 metres)

Safe to use while snorkelling in open water.

30 ATM (300 metres)

Ideal for experienced divers and those practising scuba-diving.

60 ATM (600 metres)

Professional divers, experiencing prolonged exposure underwater.

100 ATM (1000 metres)

Professional deep sea diving.

Our watch care programme

Your watch is constructed from the finest components and materials available including one of Switzerland's finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations. It's for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

Visit our website for more details about our 60|60 Guarantee and Service and Repair Programme.

60|60 Guarantee

1. 60 Day free returns

Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days to return your watch, absolutely free of charge, and receive a replacement or full refund by return – so long as it has not been worn and is returned in perfect condition.

2. 60 Month movement guarantee

Your watch, at its heart, has a top quality precision engineered Swiss movement – so it's very unlikely to give you problems with the minimum amount of care and attention, including a regular service. We recommend you return your watch to us every 3/4 years for a service, so our expert technicians can keep your fine timepiece in peak condition.

Servicing and repairs...the Christopher Ward way...

Our innovative approach to servicing and repairing your Christopher Ward watch means that having your watch serviced or repaired doesn't mean months of waiting followed by an exorbitant bill – which is more or less the experience guaranteed by every other luxury watch brand. We have developed an easy, quick and affordable expert service and repairs programme that doesn't cost the earth and has your watch back where it belongs – on your wrist – in double-quick time.

Keeping in touch with Christopher Ward

From small beginnings just a few short years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following for his eponymous watch brand and can justifiably claim to manufacture the most affordable luxury watches in the world.

For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as attractive as the watches themselves, as is the very open approach of the business which means that Chris and the team spend a lot of time communicating personally with our customers – many of whom have become friends.

As the owner of a Christopher Ward watch, if ever you need to get hold of us we are at your service. We have listed some useful contact details on the back cover.

There is also always something new going on at our website at **www.christopherward.co.uk** and, if you haven't already discovered the independent forum dedicated to our brand at **www.christopherwardforum.com** we would recommend a visit. Informative and fun, it's a great place to hear the unexpurgated view of Christopher Ward.
