

C60 Trident GMT 600

Owner's handbook

**Christopher  
Ward**

## Time on your side...

Your Christopher Ward watch has been designed and engineered by highly talented craftspeople to ensure not only accurate and precise timekeeping but also to bring a real pride of ownership that only luxury items of the highest quality can ever hope to deliver.

You have made an investment, a good one, and the aim of this handbook is to help you make the most of that investment during what I hope will be a lifetime of ownership.

A handwritten signature in black ink that reads "Chris". The letters are fluid and cursive, with a small dot above the 'i'.

Christopher Ward

## C60 Trident GMT 600

**A dual-time automatic watch for world-travellers who want a watch that has the quality to match its sporting good looks is the delivered promise of the GMT version of our best-selling Trident series.**

The magnificently re-engineered, 316L marine-grade stainless steel case now incorporates a zirconia (ZrO<sub>2</sub>) ceramic uni-directional bezel for fracture toughness and incredible scratch resistance. Moreover, the case has been designed to remain watertight at up to depths of 600 metres (2000 ft) – twice that of its predecessor.

A new crown, indices and enhanced luminosity add to the balance and usability and the new backplate with its deep-stamped Trident motif adds even more authority to this quintessential GMT.

With the supremely accurate and robust ETA 2893-2 automatic movement beating at its core, the C60 Trident GMT 600 can reasonably lay claim to being one of the best GMT's you will find anywhere and of a quality that if you were paying three times the price you wouldn't feel short changed.

## Technical information

### Features

- Swiss made
- 21 Jewel elaboré-grade mechanical movement
- 42 hours power reserve
- Dual-time GMT function
- Date calendar
- Central hacking seconds
- Anti-shock system
- Uni-directional zirconia (ZrO<sub>2</sub>) ceramic bezel
- Screw-in crown
- 3.4mm anti-reflective sapphire crystal
- Super-Luminova® dial indexes and hands
- Signature Trident counter-balance on seconds hand
- Screw-down deep-stamped 3D backplate
- Unique engraved serial number

### Technical

<b>Diameter:</b>	43mm	38mm
<b>Height:</b>	13.7mm	13.7mm
<b>Weight:</b>	105g	78g
<b>Calibre:</b>	ETA 2893-2	
<b>Case:</b>	316L stainless steel	
<b>Water Resistance:</b>	60 ATM (600 metres)	
<b>Vibrations:</b>	28,800 per hour (4 Hz)	
<b>Timing Tolerance:</b>	±20 seconds per day	
<b>Lug to lug:</b>	51.5mm	45.5mm
<b>Strap:</b>	22mm	20mm

## Setting the time/date/GMT hand

1. Crown screw-in position
2. Manual winding
3. Date/GMT setting
4. Time setting

*Unscrew and then pull out*

For a superior water resistance your crown is of the screw-in type. The crown should sit flush to the case (position **1**) in order to maintain water resistance.

- First unscrew the crown anti-clockwise from the case to position **2** for winding in power. Wind in a clockwise direction to re-power the watch. Your C60 Trident has a maximum power reserve of 42 hours when fully wound. Normal wearing will allow the rotor to start re-powering the watch over time after putting it on your wrist.
- Pull gently into position **3**. For rapid date correction, turn in an anti-clockwise direction. To set the GMT hand, turn the crown clockwise and rotate the hand until you have reached the desired time indication. The GMT hand moves in one-hour increments.
- Pull gently into position **4**. This position is used for handsetting and stopping of the second hand. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.

**PLEASE NOTE: Date correction should not be carried out between 20.00 hr and 02.00 hr as the watch gearing will already be aligning itself to change the date. The crown should always be pushed in after adjustment, and it is best to do so from position 3 to avoid advancing beyond the desired date.**

**You must always ensure the crown is fully tightened before any use in water.**

## Using the GMT hand for travel

Set the time in your new destination by pulling the crown into position **4** and move the hour/minute hands until they indicate the desired time.

Push crown into position **3** and wind, clockwise, the GMT hand around the 24-hour scale on the bezel until you have the right time at home.

E.g. If you're travelling from London at 12:10 to New York, you would turn the hour/minute hands to 7:10 (NY time is five hours behind London) and wind the GMT hand around to the 12:10 position.

Once set, it means that, for example, you can ring your friends and family without waking them in the middle of the night.

Note: The table opposite can be used to determine the appropriate time zone when setting the hour/minute hands.

## The bezel

If using the bezel for a dive and let's say the recognised maximum "no-stop time" is 55 minutes, then in this example (shown left) the time at the surface immediately before the dive is 10.08am.

However the bezel marker is at the 12.00 hr position.

- Move the bezel marker anti-clockwise so that it aligns with the 8 minute position.
- You can now read that the 55 minute no decompression limit will occur at 3 minutes past the next hour.

PLEASE NOTE: It is always useful and best practice to make a note on a dive slate before entering the water and to carry a set of dive tables should the dive plan change during the course of a dive. A safety stop for 3 to 5 minutes at 15ft is recommended at the end of all dives. A safety stop for 3 minutes at 15ft is required any time you come within 3 pressure groups of a no decompression limit, and for any dive to a depth of 100ft or deeper.

## Straps and bracelets

As you would expect, we place as much emphasis on the quality of our straps and bracelets as we do our watches. We only use the finest leathers for our straps. Similarly, we only use the finest metals in the construction of our bracelets, all of which are precision engineered for durability, efficiency and comfort.

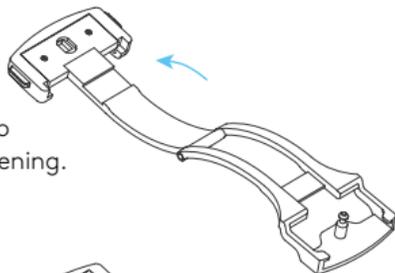

The following guidelines explain how easy it is to use and adjust your Christopher Ward strap or bracelet.

### Leather strap with Bader deployment

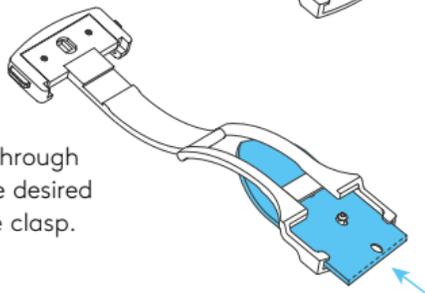

1.  
Press to release.

2.  
Pull open the clasp  
and locate the opening.

3.  
Thread the strap through  
the opening to the desired  
position. Close the clasp.

## Integrated bracelet with micro adjustment

1. Press buttons to release.

2. Pull open the clasp.

3. There are five micro adjustment positions, which allows for a maximum extension of 8.4mm. To extend, pull the lever to unlock and simultaneously pull on the bracelet into the desired position.

4. To shorten, simply push the bracelet back into the clasp.

## Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch.

For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under. Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

### 1 ATM (10 metres)

Safe to wear your watch while washing your hands with tap water.

### 3 ATM (30 metres)

Washing your car and/or general hose pipe usage.

### 5 ATM (50 metres)

Water resistant to most household shower units.

### 15 ATM (150 metres)

Safe to use while snorkelling in open water.

### 30 ATM (300 metres)

Ideal for experienced divers and those practising scuba-diving.

### 60 ATM (600 metres)

Professional divers, experiencing prolonged exposure underwater.

### 100 ATM (1000 metres)

Professional deep sea diving.

## Our watch care programme

Your watch is constructed from the finest components and materials available including one of Switzerland's finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations. It's for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

Visit our website for more details about our 60|60 Guarantee and Service and Repair Programme.

### **60|60 Guarantee**

#### **1. 60 Day free returns**

Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days to return your watch, absolutely free of charge, and receive a replacement or full refund by return – so long as it has not been worn and is returned in box-perfect condition.

#### **2. 60 Month movement guarantee**

Your watch, at its heart, has a top quality precision engineered Swiss movement – so it's very unlikely to give you problems with the minimum amount of care and attention, including a regular service. We recommend you return your watch to us every 3/4 years for a service, so our expert technicians can keep your fine timepiece in peak condition.

### **Servicing and repairs...the Christopher Ward way...**

Our innovative approach to servicing and repairing your Christopher Ward watch means that having your watch serviced or repaired doesn't mean months of waiting followed by an exorbitant bill – which is more or less the experience guaranteed by every other luxury watch brand. We have developed an easy, quick and affordable expert service and repairs programme that doesn't cost the earth and has your watch back where it belongs – on your wrist – in double-quick time.

## Keeping in touch with Christopher Ward

From small beginnings just a few short years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following for his eponymous watch brand and can justifiably claim to manufacture the most affordable luxury watches in the world.

For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as attractive as the watches themselves, as is the very open approach of the business which means that Chris and the team spend a lot of time communicating personally with our customers – many of whom have become friends.

As the owner of a Christopher Ward watch, if ever you need to get hold of us we are at your service. We have listed some useful contact details on the back cover.

There is also always something new going on at our website at **[www.christopherward.co.uk](http://www.christopherward.co.uk)** and, if you haven't already discovered the independent forum dedicated to our brand at **[www.christopherwardforum.com](http://www.christopherwardforum.com)** we would recommend a visit. Informative and fun, it's a great place to hear the unexpurgated view of Christopher Ward.
