Time on your side

Your Christopher Ward watch has been designed in Britain and engineered in Switzerland by highly talented craftspeople. This ensures not only accurate and precise timekeeping, but also brings a real pride of ownership that only watches of the highest quality standards can hope to deliver.

You have made an investment, a good one, and the aim of this manual is to help you make the most of that investment in what we hope will be a lifetime of ownership.

Chris, Mike and Peter  
(Co-founders)
When we announced the C1 Grand Malvern Collection back in 2016, it was always our intention that the JJ Calibre modifications introduced in our C9 dress range would return in updated form. Over the past two years, new interpretations of watches such as the C9 Jumping Hour and Moonphase came to follow, showcasing a more modern dial aesthetic and a new signature case design. Yet one particularly popular JJ Calibre remained conspicuously absent: JJ03, our worldtimer modification.

Good things take time, and in the case of the C1 Grand Malvern Worldtimer, the years of development input by the CW design team have paid off in glorious fashion. For while many of the C1 Grand Malvern models were gentle evolutions of their C9 counterparts, the new C1 Grand Malvern Worldtimer has been born from a nigh-on blank canvas. The root of this change came from a refreshed JJ03, whose mechanical update opened a whole new world of possibilities (excuse the pun) when it came to the C1’s dial design. With a 24-hour GMT disc that now moves in conjunction with the C1’s hands, not only is this the first ‘true’ worldtimer Christopher Ward has designed; it is also one of the most ambitious.

Thanks to the efforts of the technical team in Biel, the C1 Grand Malvern Worldtimer has delivered on those lofty ambitions once again – and all at a price that few worldtimer watches of this quality can rival.
Features

- Swiss made
- Self-winding 21 jewel movement with ‘JJ03’ in-house worldtimer module
- Unique orange city indicator to highlight chosen timezone
- 40 hour power reserve
- Colimaçonné rotor finish filled with blue lacquer
- Blue and white worldtimer dial
- Rotating 24-hour disc with night and day colouring
- International cities ring with curved finish
- Anti-reflective domed sapphire crystal
- Polished surgical-grade stainless steel case with brushed sides
- Push-down crown with twin flag motif
- Brushed and polished steel hands
- Hour and minute hands filled with T-C1 Super-LumiNova®
- Exhibition backplate with unique engraved serial number
- Eco-friendly luxury presentation case and owner’s handbook
- Italian hand-stitched Shell Cordovan quick-release strap with Bader deployment

How to operate your C1 Grand Malvern Worldtimer

**Setting the time and date**

The crown should sit flush to the case (position 1) in order to maintain water resistance.

- To re-power the watch after a period of non-use, simply wind the crown in a clockwise direction. Your C1 Grand Malvern Worldtimer has a maximum power reserve of 40 hours when fully wound. Normal wearing will allow the rotor to start re-powering the watch over time after putting it on your wrist.

- To set the time pull out the crown gently into position 2. This position is used for handsetting and stopping of the second hand. Turn the crown until you reach the correct time e.g. 10.08 hr.

For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.

- Move the crown into position 2. To set the 24-hour disc, which moves in individual hour increments, turn in a clockwise direction to rotate the current time to your nearest city location. To set the orange city indicator, turn the crown anti-clockwise until you have reached the desired city.

- To set the date pull out the crown into position 3. This position is used for handsetting and stopping of the second hand. Turn the crown until you reach the correct time e.g. 10.08 hr.
1. Manual winding
2. 24-hour disc and city indicator setting
3. Time setting

PLEASE NOTE:
Date correction should not be carried out between 18.00 hr and 02.00 hr as the watch gearing will already be aligning itself to change the date. The crown should always be pushed in after adjustment, and it is best to do so from position 3 to avoid advancing beyond the desired date.
How to operate your CJ Grand Malvern Worldtimer

Setting the 24-hour disc and city indicator

Firstly, you’ll need to set the 24-hour disc to your home city. To do this, pull the crown gently into position 2. Turning it clockwise will activate the 24-hour disc, which moves in individual hour increments. Let’s say, for example, that it’s 4pm in London. You would need to turn the crown until the number 16 on the 24-hour disc is aligned against London on the outer cities ring (figure 1). To set the orange city indicator which highlights your preferred city location, turn the crown anti-clockwise until you have reached the desired city eg. London (figure 2).
Imagine that you are flying to New York, a city 5 hours behind London on the 24-hour disc – if it is 8pm in London, it would thus be 3pm in New York. Therefore, upon arriving in New York, gently pull the crown out into position 3 to reset the hour and minute hands to 3 o’clock as read against the dial’s outer markers (figure 3). Once you have set the hands to your new local time, you then need to set the 24-hour disc. Using the crown, find position 2, and turn it clockwise until the number 15 on the 24-hour disc is aligned against New York on the outer cities ring. You can now read the time anywhere in the world at a moment’s glance (figure 4). To set the orange city indicator which highlights your preferred city location, turn the crown anti-clockwise until you have reached the desired city.
Straps

As you would expect, we place as much emphasis on the quality of our straps as we do our watches. We only use the finest materials in our straps, with quick-release pins also included for your convenience.

The following guidelines explain how easy it is to use, adjust and replace your Christopher Ward strap.

Using the quick-release pins on your strap

1. Locate the quick-release pin on your strap. Pull the pin to the side to detach your strap.

2. To reattach your strap, align the pins to the lug holes and click the strap into position. Repeat for the other side.
Leather strap with Bader deployment

1. Press to release.

2. Pull open the clasp and locate the opening.

3. Thread the strap through the opening to the desired position. Close the clasp.
Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch. For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under.

Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.
1 ATM (10 metres)
Safe to wear your watch while washing your hands with tap water

3 ATM (30 metres)
Washing your car and/or general hose pipe usage

5 ATM (50 metres)
Water resistant to most household shower units

15 ATM (150 metres)
Safe to use while snorkelling in open water

30 ATM (300 metres)
Ideal for experienced divers and those practising scuba-diving

60 ATM (600 metres)
Professional divers, experiencing prolonged exposure underwater

100 ATM (1000 metres)
Professional deep sea diving
Our watch care programme

60|60 Guarantee

Your watch is constructed from the finest components and materials available including one of Switzerland’s finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations.

It’s for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

60 Day Free Returns
Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days from despatch to return your watch, with free shipping, and receive a replacement or full refund, for which the watch must be in perfect, unworn condition and accompanied by all its original packaging and paperwork.

60 Month Movement Guarantee
Your watch has a top-quality precision engineered Swiss movement – but if it develops a movement fault within 5 years, and has been serviced by us at the recommended interval (within a maximum of 4 years from date of despatch), we will repair it for free under warranty. Not all mechanical problems or quartz battery replacements are
considered movement faults and your watch will need to be sent to us for diagnosis and service history checks, before processing a repair under warranty.

Servicing and Repairs - the Christopher Ward way...
Our innovative approach to service and repair means that having your watch attended to doesn’t mean months of waiting followed by an exorbitant bill. We have developed a quick, easy and affordable expert service and repairs process that doesn’t cost the earth and has the watch back where it belongs – on your wrist – in reasonable time.

We recommend you service your watch at intervals of 3-4 years to keep it in peak condition and to maintain your 60 month guarantee. If your watch develops an issue within 60 months of despatch, we will first check its service history before progressing a repair. If you have not had your watch serviced at the recommended interval, we will not cover the cost of the repair under warranty, and will recommend a maintenance service in addition to any repair work due.

christopherward.co.uk/cservices/60-60-guarantee
From small beginnings just 15 years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following and can justifiably claim to manufacture the most affordable luxury watches in the world. For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as smart as the watches themselves. The very open approach of the business sees Chris, Mike and Peter, as well as the rest of the team, spending lots of time communicating personally with customers – listening to feedback which helps us continually improve as we grow. As the owner of a Christopher Ward watch, if you ever need to get hold of us we are at your service. There is always something new on our website, across our social media communities and on the Christopher Ward Forum – informative and fun, these are the best places to join the conversation about the latest new releases, news and offers in the world of Christopher Ward.
