

# C65 Trident Diver SH21 Limited Edition

Owner's Handbook

## Time on your side

Your Christopher Ward watch has been designed in Britain and engineered in Switzerland by highly talented craftspeople. This ensures not only accurate and precise timekeeping, but also brings a real pride of ownership that only watches of the highest quality standards can hope to deliver.

You have made an investment, a good one, and the aim of this manual is to help you make the most of that investment in what we hope will be a lifetime of ownership.

Chris, Mike and Peter  
(Co-founders)

### C65 Trident Diver SH21 Limited Edition

In the C65 Trident Diver SH21 Limited Edition, you'll find a watch that will excite fans of horology, old-school visuals and a certain secret agent all in equal measure.

Following in the footsteps of 2018's C65 Trident Bronze SH21 Limited Edition, a release considered one of the most attractive watches in the recent Christopher Ward arsenal, this new version retains many aspects of that release; it also makes some changes to help carve out its own distinctive character. While the C65 Collection was born to capture the essence of the slim dive watches worn by Connery as 007 in the mid-1960s era, the presence of our 'light-catcher' case in stainless steel evokes the power of modern-day Daniel Craig.

Old and new continue to combine in the C65, even within the presence of our in-house chronometer Calibre SH21. A feature traditionally found throughout pocket watches and other vintage pieces, a small second subdial resides at 6 o'clock; yet the modern capabilities of SH21 are showcased just adjacent, where an indicator displays what remains of its impressive 120-hour power reserve. Whilst offering something of a chronograph look, they offer a constant reminder of the Swiss engineering ticking away inside.

A 150-piece limited edition whose '60s looks are ready for action at any moment, the C65 Trident Diver SH21 Limited Edition has a few technical gadgets up its sleeve for its wearer to enjoy. Water resistant to 150m, it's ready to 'dive another day'.

## Features

- Swiss made
- Limited edition of 150 pieces
- In-house 33 jewel Calibre SH21 automatic movement
- 120 hour power reserve with power reserve indicator complication
- Hour, minute, small second, date
- Anti-shock system
- Brushed and polished marine-grade stainless steel case
- High Definition "Trident" motif screw-down backplate
- Push-in crown stamped with twin flag motif
- Unidirectional aluminium bezel
- "Glass box" sapphire crystal
- Matte finish dial
- Azzuré sub dial finish
- Christopher Ward at 12 o'clock
- Old Radium Super-LumiNova® indexes, numerals and hands
- Unique engraved serial number

## Technical Information

Calibre	<b>SH21 automatic chronometer (COSC) with power reserve indicator, small second and date</b>
Case	<b>316L stainless steel</b>
Diameter	<b>41mm</b>
Height	<b>13.4mm</b>
Lug to lug	<b>47.1mm</b>
Weight	<b>77g</b>
Water resistance	<b>15 ATM (150 metres)</b>
Vibrations	<b>28,800 per hour (3Hz)</b>
Timing tolerance	<b>-4/+6 seconds per day</b>
Strap width	<b>22mm</b>

## Setting the time and date

The crown should sit flush to the case (position **1**) in order to maintain water resistance. To re-power the watch after a period of non-use, simply wind the crown in a clockwise direction until you begin to feel a resistance. Your C65 Trident Diver SH21 has a maximum power reserve of 120 hours when fully wound.

- For rapid date correction pull gently into position **2** and turn in an anti-clockwise direction.
- For setting the time pull gently into position **3** and turn clockwise to advance the time. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards. Push the crown back to position **1**.

1. Manual winding
2. Date setting
3. Time setting

**PLEASE NOTE:**

*Date correction should not be carried out between 20.00 hr and 02.00 hr as the watch gearing will already be aligning itself to change the date. The crown should always be pushed in after adjustment, and it is best to do so from position 3 to avoid advancing beyond the desired date.*

## The bezel

If using the bezel for a dive and let's say the recognised maximum "no-stop time" is 55 minutes, then in this example (shown right) the time at the surface immediately before the dive is 10.08am. However the bezel marker is at the 12.00 hr position. Move the bezel marker anti-clockwise so that it aligns with the 8 minute position. You can now read that the 55 minute no decompression limit will occur at 3 minutes past the next hour.

**PLEASE NOTE:** *It is always useful and best practice to make a note on a dive slate before entering the water and to carry a set of dive tables should the dive plan change during the course of a dive. A safety stop for 3 to 5 minutes at 15ft is recommended at the end of all dives. A safety stop for 3 minutes at 15ft is required any time you come within 3 pressure groups of a no decompression limit, and for any dive to a depth of 100ft or deeper.*

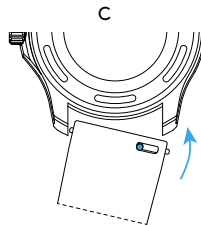

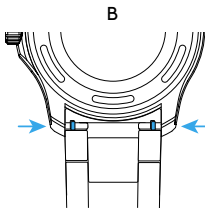

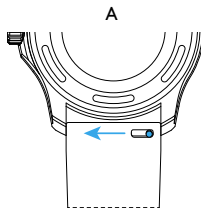

## Straps and bracelets

As you would expect, we place as much emphasis on the quality of our straps and bracelets as we do our watches. We only use the finest materials in our straps, with quick-release pins also included for your convenience.

The following guidelines explain how easy it is to use, adjust and replace your Christopher Ward strap or bracelet.

### Using the quick-release pins on your strap/bracelet

1. Locate the quick-release pin (or pins) on your strap (A) or bracelet (B). Pull the pin(s) inwards to detach.
2. To reattach your strap (C) or bracelet (D), pull the pin(s) inwards, and align the spring bars so that they click securely into the lug holes on each side.

## How to use the micro adjustment on your bracelet

1. Press buttons to release
2. Pull open the clasp
3. There are five micro adjustment positions, which allows for a maximum extension of 8.4mm. To extend, pull the lever to unlock and simultaneously pull on the bracelet into the desired position.
4. To shorten, simply push the bracelet back into the clasp.

## Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch. For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under.

Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

**1 ATM (10 metres)**

Safe to wear your watch while washing your hands with tap water

**15 ATM (150 metres)**

Safe to use while snorkelling in open water

**100 ATM (1000 metres)**

Professional deep sea diving

**3 ATM (30 metres)**

Washing your car and/or general hose pipe usage

**30 ATM (300 metres)**

Ideal for experienced divers and those practising scuba-diving

**5 ATM (50 metres)**

Water resistant to most household shower units

**60 ATM (600 metres)**

Professional divers, experiencing prolonged exposure underwater

## 60|60 Guarantee

Your watch is constructed from the finest components and materials available including one of Switzerland's finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations.

It's for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

### **60 Day Free Returns**

Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days from despatch to return your watch, with free shipping, and receive a replacement or full refund, for which the watch must be in perfect, unworn condition and accompanied by all its original packaging and paperwork.

### **60 Month Movement Guarantee**

Your watch has a top-quality precision engineered Swiss movement – but if it develops a movement fault within 5 years, and has been serviced by us at the recommended interval (within a maximum of 4 years from date of despatch), we will repair it for free under warranty. Not all mechanical problems or quartz battery replacements are

considered movement faults and your watch will need to be sent to us for diagnosis and service history checks, before processing a repair under warranty.

### **Servicing and Repairs - the Christopher Ward way...**

Our innovative approach to service and repair means that having your watch attended to doesn't mean months of waiting followed by an exorbitant bill. We have developed a quick, easy and affordable expert service and repairs process that doesn't cost the earth and has the watch back where it belongs – on your wrist – in reasonable time.

**We recommend you service your watch at intervals of 3-4 years** to keep it in peak condition and to maintain your **60 month guarantee**. If your watch develops an issue within 60 months of despatch, we will first check its service history before progressing a repair. If you have not had your watch serviced at the recommended interval, we will not cover the cost of the repair under warranty, and will recommend a maintenance service in addition to any repair work due.

## Keeping in touch with Christopher Ward

From small beginnings just 15 years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following and can justifiably claim to manufacture the most affordable luxury watches in the world. For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as smart as the watches themselves. The very open approach of the business sees Chris, Mike and Peter, as well as the rest of the team, spending lots of time communicating

personally with customers – listening to feedback which helps us continually improve as we grow. As the owner of a Christopher Ward watch, if you ever need to get hold of us we are at your service. There is always something new on our website, across our social media communities and on the Christopher Ward Forum – informative and fun, these are the best places to join the conversation about the latest new releases, news and offers in the world of Christopher Ward.
