Time on your side

Your Christopher Ward watch has been designed in Britain and engineered in Switzerland by highly talented craftspeople. This ensures not only accurate and precise timekeeping, but also brings a real pride of ownership that only watches of the highest quality standards can hope to deliver.

You have made an investment, a good one, and the aim of this manual is to help you make the most of that investment in what we hope will be a lifetime of ownership.

Mike France
CEO & co-founder
Congratulations on becoming the owner of a C60 Lympstone.

Officially approved by the UK Ministry Of Defence, the watch is named after the Royal Marines’ Commando Training Centre in Devon. And is a fitting – and feature-packed – tribute to one of the world’s most respected fighting forces.

Built for the most testing of conditions, the dial is constructed in ultra-tough, ultra-light forged carbon – a material made from chopped carbon fibres infused with resin (there are around 500,000 fibres per square inch).

The C60 Lympstone also boasts a first for Christopher Ward: the inclusion of a rotating inner-compass bezel which lets you orientate yourself using the sun. And because this is a watch inspired by the Royal Marines, it’s also waterproof to 600m.

Of course, a timepiece this special needs a movement of the highest order. That’s why powering the C60 Lympstone is a chronometer version of Sellita’s SW200 – a calibre that puts it in the top six percent of all Swiss-made watches for accuracy.

All these qualities mean the C60 Lympstone will be your trusty companion wherever, and however, you go. Or as the Royal Marines motto, laser-engraved onto the back of the timepiece, says: ‘Per mare, per terram’ – by sea, by land.

Enjoy the watch.
How to operate your C60 Lympstone

Display and control buttons

Your C60 Lympstone has a maximum power reserve of 38 hours when fully wound. To re-power the watch after a period of non-use, simply wind the crown for approximately 20 revolutions. Normal wearing will very quickly allow the rotor to start re-powering the watch over time after putting it on your wrist.
Features

- Swiss made
- 26 jewel self-winding mechanical chronometer
- 38-hour power reserve
- Twin-flag engraving over ‘Colimaçoné’ finish on the rotor
- Brushed gun metal PVD marine-grade stainless steel case
- Black DLC bezel and caseback

- High Definition Royal Marines crest laser-engraved on screw down backplate
- Screw-down dual crowns stamped with twin-flag motif
- Brushed unidirectional ceramic bezel with Grade X1 GL C1 Super-LumiNova®-applied numerals and markers
- Unique engraved serial number
- Anti-reflective sapphire crystal

- Christopher Ward logo at 12 o’clock
- Forged carbon dial
- Rotating inner-compass bezel
- Super-LumiNova®-filled hands, inner-bezel markings and indexes
- Eco-friendly luxury presentation case and owner’s handbook

How to operate your C60 Lympstone

Setting the time

For a superior water resistance your crown is of the screw-in type. The crown should sit flush to the case (position 1) in order to maintain water resistance.

- First unscrew the crown anti-clockwise from the case to position 2 for winding in power. Wind in a clockwise direction to re-power the watch. Your C60 Lympstone has a maximum power reserve of 38 hours when fully wound. Normal wearing will allow the rotor to start re-powering the watch over time after putting on your wrist. After a period of non-use we recommend that you manually wind the watch at least 20 times to ensure there is sufficient power in the watch before the rotor maintains the power.

- Pull gently into position 3. This position is used for handsetting and stopping of the seconds hand. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.
1. Crown screw-down position
2. Manual winding
3. Time setting

Diving with your watch

If using the bezel for a dive and let’s say the recognised maximum "no-stop time" is 55 minutes, then in this example (shown right) the time at the surface immediately before the dive is 10:10am. However the bezel marker is at the 12:00 hr position.

- Move the bezel marker anti-clockwise so that it aligns with the 10 minute position.

- You can now read that the 55 minute no decompression limit will occur at 5 minutes past the next hour.

PLEASE NOTE:
It is always useful and best practice to make a note on a dive slate before entering the water and to carry a set of dive tables should the dive plan change during the course of a dive. A safety stop for 3 to 5 minutes at 15ft is recommended at the end of all dives. A safety stop for 3 minutes at 15ft is required any time you come within 3 pressure groups of a no decompression limit, and for any dive to a depth of 100ft or deeper.
**How to use the solar compass**

The watch is fitted with a solar compass on the inner bezel.

Here’s how to use it.

1. *Unscrew the upper crown. This lets you rotate the compass bezel.*
2. *Point the watch’s hour hand in the direction of the sun. Make sure the watch is horizontal.*
3. *Rotate the ‘S’ (‘South’) on the compass bezel until it’s halfway between the hour hand and the index at 12 o’clock.*
4. *You can now read the points of the compass to determine your position.*

**Example:** If it’s 10 o’clock in the morning, point the hour hand at the sun. Then rotate the ‘S’ until it reaches 11 o’clock (ie: halfway between the hour hand and the 12 o’clock index). You can now work out your position.

‘If you are in the northern hemisphere use ‘S’ (South) on the compass bezel. If in the southern hemisphere, use position ‘N’ (North) instead.

**PLEASE NOTE:**
These determinations are approximate as there is some discrepancy at different latitudes and in different seasons.
A. Northern hemisphere

B. Southern hemisphere

Straps and bracelets

As you would expect, we place as much emphasis on the quality of our straps and bracelets as we do our watches. We only use the finest materials in our straps, with quick-release pins also included for your convenience.

The following guidelines explain how easy it is to use, adjust and replace your Christopher Ward strap or bracelet.

Using the quick-release pins on your strap/bracelet

1. Locate the quick-release pin (or pins) on your strap (A) or bracelet (B). Pull the pin(s) inwards to detach.

2. To reattach your strap (C) or bracelet (D), pull the pin(s) inwards, and align the spring bars so that they click securely into the lug holes on each side.
**How to use the micro adjustment on your bracelet**

1. Press buttons to release.
2. Pull open the clasp.
3. There are five micro adjustment positions, which allows for a maximum extension of 8.4mm. To extend, pull the lever to unlock and simultaneously pull on the bracelet into the desired position.
4. To shorten, simply push the bracelet back into the clasp.
Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch. For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under.

Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.
1 ATM (10 metres)
Safe to wear your watch while washing your hands with tap water

3 ATM (30 metres)
Washing your car and/or general hose pipe usage

5 ATM (50 metres)
Water resistant to most household shower units

15 ATM (150 metres)
Safe to use while snorkelling in open water

30 ATM (300 metres)
Ideal for experienced divers and those practising scuba-diving

60 ATM (600 metres)
Professional divers, experiencing prolonged exposure underwater

100 ATM (1000 metres)
Professional deep sea diving
Our watch care programme

60|60 Guarantee

Your watch is constructed from the finest components and materials available including one of Switzerland’s finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations.

It’s for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

60 Day Free Returns

Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days from despatch to return your watch, with free shipping, and receive a replacement or full refund, for which the watch must be in perfect, unworn condition and accompanied by all its original packaging and paperwork.

60 Month Movement Guarantee

Your watch has a top-quality precision engineered Swiss movement – but if it develops a movement fault within 5 years, and has been serviced by us at the recommended interval (within a maximum of 4 years from date of despatch), we will repair it for free under warranty. Not all mechanical problems or quartz battery replacements are
considered movement faults and your watch will need to be sent to us for diagnosis and service history checks, before processing a repair under warranty.

Servicing and Repairs - the Christopher Ward way...
Our innovative approach to service and repair means that having your watch attended to doesn’t mean months of waiting followed by an exorbitant bill. We have developed a quick, easy and affordable expert service and repairs process that doesn’t cost the earth and has the watch back where it belongs – on your wrist – in reasonable time.

We recommend you service your watch at intervals of 3-4 years to keep it in peak condition and to maintain your 60 month guarantee. If your watch develops an issue within 60 months of despatch, we will first check its service history before progressing a repair. If you have not had your watch serviced at the recommended interval, we will not cover the cost of the repair under warranty, and will recommend a maintenance service in addition to any repair work due.

PLEASE NOTE:
The 60|60 Guarantee does not cover accidental damage. Any service or repair by a third party retailer will void your 60|60 Guarantee. For more details, please visit our website.

Keeping in touch with Christopher Ward

From small beginnings just 15 years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following and can justifiably claim to manufacture the most affordable luxury watches in the world. For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as smart as the watches themselves. The very open approach of the business sees Chris, Mike and Peter, as well as the rest of the team, spending lots of time communicating personally with customers – listening to feedback which helps us continually improve as we grow. As the owner of a Christopher Ward watch, if you ever need to get hold of us we are at your service. There is always something new on our website, across our social media communities and on the Christopher Ward Forum – informative and fun, these are the best places to join the conversation about the latest new releases, news and offers in the world of Christopher Ward.
