

C65 Aquitaine Bronze COSC

Owner's Handbook

Time on your side

Your Christopher Ward watch has been designed in Britain and engineered in Switzerland by highly talented craftspeople. This ensures not only accurate and precise timekeeping, but also brings a real pride of ownership that only watches of the highest quality standards can hope to deliver.

You have made an investment, a good one, and the aim of this manual is to help you make the most of that investment in what we hope will be a lifetime of ownership.

Mike France
CEO & co-founder

The Aquitaine collection

The C65 Collection began as an homage to the golden age of dive watches.

Now it's reborn as the Gallic-inspired C65 Aquitaine: a radically redesigned and upgraded retro dive watch – with a curved sapphire bezel that's as elegant as it is tough.

Aquitaine is an historic French coastal region home to Bordeaux and its wines, and – most pertinently – undersea explorer Jacques Cousteau.

While the Aquitaine's looks are vintage, its engineering and build quality are anything but. Water-resistance is up from 150m to 200m. There's also a new open case back, revealing an automatic Sellita movement with a higher degree of finishing than before.

And most noticeable of all, the bezel now has a curved and highly polished sapphire insert. It catches the light wonderfully and allows our watchmakers to make more effective use of colour than with steel or ceramic.

The Aquitaine is such a step up from the first C65, it's like it's jumped four generations in one go. This is a grown-up timepiece that's both undeniably retro and absolutely modern. A watch you'll treasure for years to come.

C65 Aquitaine Bronze COSC

Congratulations on becoming the owner of a C65 Aquitaine Bronze COSC.

As you can tell, this is no ordinary watch. First, it's an Aquitaine: a timepiece inspired by the first modern dive watch from 1953, though one which employs techniques and materials almost unheard of in the mid-20th century.

Like other models in the Aquitaine Collection, it carries a sapphire bezel that's 50 percent harder than ceramic, and boasts a perfectly proportioned dial that begs to be noticed.

And then there's the Light-catcher™ case. While it fits as snugly as others in the Collection its bronze construction delivers a subtly

different experience. The way bronze contrasts with the Marine Blue of the dial and bezel is a treat for the eyes – have a look! – while the patina it develops over time is something that makes each watch a one-off.

Finally, your new watch is powered by a COSC version of Sellita's SW200-1 automatic movement, making this the only chronometer in the range. Which means wherever you take your C65 Aquitaine Bronze COSC, you'll always benefit from the gold standard in timekeeping.

Wear it in good health.

Display and controls

Your C65 Aquitaine Bronze COSC has a maximum power reserve of 38 hours when fully wound. To re-power the watch after a period of non-use, simply wind the crown for approximately 20 revolutions. Normal wearing will very quickly allow the rotor to start re-powering the watch over time after putting it on your wrist.

Features

- Swiss made
- Self-winding chronometer mechanical movement
- 38-hour power reserve
- Date calendar
- Central hacking seconds hand
- Anti-shock system
- Twin-flag engraving over 'Colimaçoné' finish on the rotor
- Brushed and polished Light-catcher™ bronze case with steel caseback
- Elaboré 'Colimaçoné' finish on the movement
- Unidirectional bronze bezel with sapphire insert (with luminous indices and numbers)
- Signature Trident counter-balance on seconds hand
- Anti reflective sapphire crystal
- Diamond polished hands and indexes
- Super-LumiNova® Grade X1 hands, indexes
- Screw-down display caseback
- Embossed screw-down crown
- Unique engraved serial number
- Eco-friendly luxury presentation case and owner's handbook

Technical Information

Calibre	Sellita SW200 COSC
Case	Bronze
Diameter	41mm
Height	12.45mm
Lug to lug	46.68mm
Weight	75g
Water resistance	20 ATM (200 metres)
Vibrations	28,800 per hour (4Hz)
Timing tolerance	-4/+6 seconds per day
Strap width	22mm

Setting the time and date

For a superior water resistance your crown is of the screw-down type. The crown should sit flush to the case (position **1**) in order to maintain water resistance.

- First unscrew the crown anti-clockwise from the case to position **2** for winding in power. Wind in a clockwise direction to re-power the watch. Your C65 Aquitaine Bronze COSC has a maximum power reserve of 38 hours when fully wound.
- Pull gently into position **3**. For rapid date correction, turn in a clockwise direction.
- Pull gently into position **4**. This position is used for handsetting and stopping of the seconds hand. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.

1. Crown screw-down position
2. Manual winding
3. Date setting
4. Time setting

PLEASE NOTE:

*Date correction should not be carried out between 20.00 hr and 02.00 hr as the watch gearing will already be aligning itself to change the date. The crown should always be pushed in after adjustment, and it is best to do so from position **3** to avoid advancing beyond the desired date. You must always ensure the crown is fully tightened before any use in water.*

Diving with your watch

If using the bezel for a dive and let's say the recognised maximum "no-stop time" is 55 minutes, then in this example (shown right) the time at the surface immediately before the dive is 10.08am. However the bezel marker is at the 12.00 hr position.

- Move the bezel marker anti-clockwise so that it aligns with the 8 minute position.
- You can now read that the 55 minute no decompression limit will occur at 3 minutes past the next hour.

PLEASE NOTE:

It is always useful and best practice to make a note on a dive slate before entering the water and to carry a set of dive tables should the dive plan change during the course of a dive. A safety stop for 3 to 5 minutes at 15ft is recommended at the end of all dives. A safety stop for 3 minutes at 15ft is required any time you come within 3 pressure groups of a no decompression limit, and for any dive to a depth of 100ft or deeper.

No decompression limit

Start of dive

Straps

As you would expect, we place as much emphasis on the quality of our straps as we do our watches. We only use the finest materials in our straps, with quick-release pins also included for your convenience.

The following guidelines explain how easy it is to use, adjust and replace your Christopher Ward strap.

Using the quick-release pins on your strap

1. Locate the quick-release pin on your strap.
Pull the pin to the side to detach your strap.

2. To reattach your strap, align the pins to the lug holes and click the strap into position. Repeat for the other side.

Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch. For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under.

Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

1 ATM (10 metres)

Safe to wear your watch while washing your hands with tap water

20 ATM (200 metres)

Safe to use while snorkelling in open water

100 ATM (1000 metres)

Professional deep sea diving

3 ATM (30 metres)

Washing your car and/or general hose pipe usage

30 ATM (300 metres)

Ideal for experienced divers and those practising scuba-diving

5 ATM (50 metres)

Water resistant to most household shower units

60 ATM (600 metres)

Professional divers, experiencing prolonged exposure underwater

60|60 Guarantee

Your watch is constructed from the finest components and materials available including one of Switzerland's finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations.

It's for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

60 Day Free Returns

Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days from despatch to return your watch, with free shipping, and receive a replacement or full refund, for which the watch must be in perfect, unworn condition and accompanied by all its original packaging and paperwork.

60 Month Movement Guarantee

Your watch has a top-quality precision engineered Swiss movement – but if it develops a movement fault within 5 years, and has been serviced by us at the recommended interval (within a maximum of 4 years from date of despatch), we will repair it for free under warranty. Not all mechanical problems or quartz battery replacements are

considered movement faults and your watch will need to be sent to us for diagnosis and service history checks, before processing a repair under warranty.

Servicing and Repairs - the Christopher Ward way...

Our innovative approach to service and repair means that having your watch attended to doesn't mean months of waiting followed by an exorbitant bill. We have developed a quick, easy and affordable expert service and repairs process that doesn't cost the earth and has the watch back where it belongs – on your wrist – in reasonable time.

We recommend you service your watch at intervals of 3-4 years to keep it in peak condition and to maintain your **60 month guarantee**. If your watch develops an issue within 60 months of despatch, we will first check its service history before progressing a repair. If you have not had your watch serviced at the recommended interval, we will not cover the cost of the repair under warranty, and will recommend a maintenance service in addition to any repair work due.

PLEASE NOTE:

The 60|60 Guarantee does not cover accidental damage. Any service or repair by a third party retailer will void your 60|60 Guarantee. For more details, please visit our website.

Keeping in touch with Christopher Ward

From small beginnings just 18 years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following and can justifiably claim to manufacture the most affordable luxury watches in the world. For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as smart as the watches themselves. The very open approach of the business sees Mike and Peter, as well as the rest of the team, spending lots of time communicating

personally with customers – listening to feedback which helps us continually improve as we grow. As the owner of a Christopher Ward watch, if you ever need to get hold of us we are at your service. There is always something new on our website, across our social media communities and on the Christopher Ward Forum – informative and fun, these are the best places to join the conversation about the latest new releases, news and offers in the world of Christopher Ward.
