

# C7 Rosso Corsa COSC Limited Edition

Owner's Handbook

## Time on your side

Your Christopher Ward watch has been designed in Britain and engineered in Switzerland by highly talented craftspeople. This ensures not only accurate and precise timekeeping, but also brings a real pride of ownership that only watches of the highest quality standards can hope to deliver.

You have made an investment, a good one, and the aim of this manual is to help you make the most of that investment in what we hope will be a lifetime of ownership.

Chris, Mike and Peter  
(Co-founders)

### C7 Rosso Corsa COSC Limited Edition

After months, sometimes years, of developing a watch, it's a hugely gratifying feeling when your customers immediately connect with a new release.

So when the first iteration of our C7 Rapide Day Date COSC Limited Edition raced out of our stockroom at a rate similar to that of an F1 car hitting top speed, we knew we had to produce another – and this time, we had an idea that would create a watch just as special as its predecessor.

Following in the footsteps of an earlier CW classic, this new 200-piece Day Date emerges from its paint workshop decorated in Rosso Corsa, or Italian Racing Red, colours. Initially selected by an early form of the FIA (International Automobile Federation) as Italy's national racing colour in the 1920s, Rosso Corsa has become ingrained in

popular culture as being synonymous with the output of legendary companies including Alfa Romeo, Maserati and Ferrari.

It's the perfect addition to any motorsport watch, but in this C7, it makes even more sense. With its dial and bezel both resplendent in this rich red hue – a throwback to our C70 Rosso Corsa 1921 Chronometer, whose dial colour drew such praise it became our foundation going forward – they perfectly match the matte aluminium case band present as part of our Rapide Collection's striking four-piece case.

Inside the Rosso Corsa, an ETA 2836 movement provides a titular day date complication, as well as chronometer-certified timekeeping present in only 6% of all Swiss-made watches. In a lifestyle where looking good is just as crucial as what features under the bonnet, the C7 Rosso Corsa COSC Limited Edition is a watch that excels on all levels.

## Features

- Swiss made
- Limited edition of 200 pieces
- 25 jewel self-winding chronometer movement
- 38 hour power reserve
- Hour, minute, central seconds, day date function
- Black diamond-like carbon (DLC) coated 316L stainless steel and red aluminium four-piece case

- Anti-reflective flat sapphire crystal
- Super-LumiNova® indexes
- Day date window with black disc
- Screw-in crown
- Deep-stamped screw-down backplate with unique engraved serial number

## Technical Information

Calibre	<b>ETA 2836 COSC</b>
Case	<b>316L stainless steel and aluminium</b>
Diameter	<b>42mm</b>
Height	<b>11.15mm</b>
Lug to lug	<b>48.2mm</b>
Weight	<b>71g</b>
Water resistance	<b>10 ATM (100 metres)</b>
Vibrations	<b>28,800 per hour (4Hz)</b>
Timing tolerance	<b>-4/+6 seconds per day</b>
Strap width	<b>22mm</b>

## Setting the time/date

For a superior water resistance your crown is of the screw-in type. The crown should sit flush to the case (position **1**) in order to maintain water resistance.

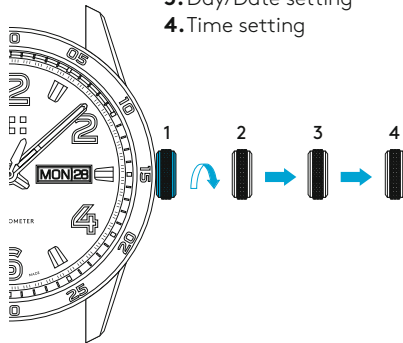

- First unscrew the crown anti-clockwise from the case to position **2** for winding in power. Wind in a clockwise direction to re-power the watch. Your C7 Rosso Corsa COSC has a maximum power reserve of 38 hours when fully wound. After a period of non-use, we recommend manually winding the watch to ensure the rotor weight sustains

the amount of power in the mainspring whilst worn on your wrist – this can be done via twenty full revolutions of the crown.

- Pull gently into position **3**. For rapid day correction, turn in an anti-clockwise direction. For rapid date correction, turn in a clockwise direction.
- Pull gently into position **4**. This position is used for handsetting and stopping of the second hand.

**PLEASE NOTE:** The crown should always be pushed in after adjustment, and it is best to do so from position 3 to avoid advancing beyond the desired date. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.

1. Crown screw-in position
2. Manual winding
3. Day/Date setting
4. Time setting

## Straps

As you would expect, we place as much emphasis on the quality of our straps as we do our watches. We only use the finest materials in our straps, with quick-release pins also included for your convenience.

The following guidelines explain how easy it is to use, adjust and replace your Christopher Ward strap.

### Using the quick-release pins on your strap

1. Locate the quick-release pin on your strap.  
Pull the pin to the side to detach your strap.

2. To reattach your strap, align the pins to the lug holes and click the strap into position.  
Repeat for the other side.

## Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch. For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under.

Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

**1 ATM (10 metres)**

Safe to wear your watch while washing your hands with tap water

**15 ATM (150 metres)**

Safe to use while snorkelling in open water

**100 ATM (1000 metres)**

Professional deep sea diving

**3 ATM (30 metres)**

Washing your car and/or general hose pipe usage

**30 ATM (300 metres)**

Ideal for experienced divers and those practising scuba-diving

**10 ATM (100 metres)**

Water resistant to most household shower units

**60 ATM (600 metres)**

Professional divers, experiencing prolonged exposure underwater

## 60|60 Guarantee

Your watch is constructed from the finest components and materials available including one of Switzerland's finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations.

It's for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

### 60 Day Free Returns

Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days from despatch to return your watch, with free shipping, and receive a replacement or full refund, for which the watch must be in perfect, unworn condition and accompanied by all its original packaging and paperwork.

### 60 Month Movement Guarantee

Your watch has a top-quality precision engineered Swiss movement – but if it develops a movement fault within 5 years, and has been serviced by us at the recommended interval (within a maximum of 4 years from date of despatch), we will repair it for free under warranty. Not all mechanical problems or quartz battery replacements are

considered movement faults and your watch will need to be sent to us for diagnosis and service history checks, before processing a repair under warranty.

### **Servicing and Repairs - the Christopher Ward way...**

Our innovative approach to service and repair means that having your watch attended to doesn't mean months of waiting followed by an exorbitant bill. We have developed a quick, easy and affordable expert service and repairs process that doesn't cost the earth and has the watch back where it belongs – on your wrist – in reasonable time.

**We recommend you service your watch at intervals of 3-4 years** to keep it in peak condition and to maintain your **60 month guarantee**. If your watch develops an issue within 60 months of despatch, we will first check its service history before progressing a repair. If you have not had your watch serviced at the recommended interval, we will not cover the cost of the repair under warranty, and will recommend a maintenance service in addition to any repair work due.

## Keeping in touch with Christopher Ward

From small beginnings just 15 years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following and can justifiably claim to manufacture the most affordable luxury watches in the world. For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as smart as the watches themselves. The very open approach of the business sees Chris, Mike and Peter, as well as the rest of the team, spending lots of time communicating

personally with customers – listening to feedback which helps us continually improve as we grow. As the owner of a Christopher Ward watch, if you ever need to get hold of us we are at your service. There is always something new on our website, across our social media communities and on the Christopher Ward Forum – informative and fun, these are the best places to join the conversation about the latest new releases, news and offers in the world of Christopher Ward.
