

C65 Aquitaine GMT

Owner's Handbook

Time on your side

Your Christopher Ward watch has been designed in Britain and engineered in Switzerland by highly talented craftspeople. This ensures not only accurate and precise timekeeping, but also brings a real pride of ownership that only watches of the highest quality standards can hope to deliver.

You have made an investment, a good one, and the aim of this manual is to help you make the most of that investment in what we hope will be a lifetime of ownership.

Mike France
CEO & co-founder

The Aquitaine collection

The C65 Collection began as an homage to the golden age of dive watches.

Now it's reborn as the Gallic-inspired C65 Aquitaine: a radically redesigned and upgraded retro dive watch – with a curved sapphire bezel that's as elegant as it is tough.

Aquitaine is an historic French coastal region home to Bordeaux and its wines, and – most pertinently – undersea explorer Jacques Cousteau.

While the Aquitaine's looks are vintage, its engineering and build quality are anything but. Water-resistance is up from 150m to 200m. There's also a new open case back, revealing a self-winding Sellita movement with a higher degree of finishing than before.

And most noticeable of all, the bezel now has a curved and highly polished sapphire insert. It catches the light wonderfully and allows our watchmakers to make more effective use of colour than with steel or ceramic.

The Aquitaine is such a step up from the first C65, it's like it's jumped four generations in one go. This is a grown-up timepiece that's both undeniably retro and absolutely modern. A watch you'll treasure for years to come.

C65 Aquitaine GMT

Congratulations on the purchase of your C65 Aquitaine GMT.

It's often said that once you own a GMT, it's hard to go back to a regular three-handed timepiece. And that's particularly true of the C65 Aquitaine GMT.

Like all GMTs, it traces its history back to the 1950s when long-distance pilots needed a watch that could tell the time in the city they'd landed in and measure the time back home.

But the C65 Aquitaine GMT is so much more than a watchmaking history lesson: this is a thoroughly modern timepiece that uses techniques and materials almost unheard of in the mid-20th century.

Like the other watches in the Aquitaine Collection, it carries a see-through sapphire bezel that's 50 percent harder than ceramic. Meanwhile, the GMT hand boasts a bold, blue arrowhead tip that contrasts beautifully with the White Sand dial.

Any great watch needs a great movement. And providing accurate, reliable timekeeping is Sellita's 25-jewel SW330-2 calibre. Not only does it give you dual timekeeping but also boasts a generous 56-hour power reserve.

Of course, while it's wise to know your watch's essential features, the only way to truly understand is to take it out into the world – and see where it leads you.

Display and controls

Your C65 Aquitaine GMT has a maximum power reserve of up to 56 hours when fully wound. To re-power the watch after a period of non-use, simply wind the crown for approximately 20 revolutions. Normal wearing will very quickly allow the rotor to start re-powering the watch over time after putting it on your wrist.

Features

- Swiss made
- Self-winding 25 jewel mechanical movement
- Up to 56-hour power reserve
- GMT complication
- Date calendar
- Central hacking seconds hand
- Anti-shock system
- Twin-flag engraving over 'Colimaçoné' finish on the rotor
- Elaboré 'Colimaçoné' finish on the movement
- Bidirectional stainless steel bezel with Sapphire insert (with luminous triangle and numbers)
- Super-LumiNova® Grade X1 hands and indexes
- Diamond polished hands and indexes
- Signature Trident counter-balance on seconds hand
- Brushed and polished Light-catcher™ steel case
- Anti-reflective sapphire crystal
- Screw-down display caseback
- Embossed screw-down crown
- Unique engraved serial number
- Eco-friendly luxury presentation case and owner's handbook

Technical Information

Calibre	Sellita SW330-2
Case	Stainless steel
Diameter	41mm
Height	12.7mm
Lug to lug	46.7mm
Weight	70g
Water resistance	20 ATM (200 metres)
Vibrations	28,800 per hour (4Hz)
Timing tolerance	-20/+20 seconds per day
Strap width	22mm

Setting the time, date and GMT hand

For a superior water resistance your crown is of the screw-down type. The crown should sit flush to the case (position **1**) in order to maintain water resistance.

- First unscrew the crown anti-clockwise from the case to position **2** for winding in power. Wind in a clockwise direction to re-power the watch. Your C65 Aquitaine GMT has a maximum power reserve of up to 56 hours when fully wound.
- Pull gently into position **3**. For rapid date correction, turn in an anti-clockwise direction. To set the GMT hand, turn the crown clockwise and rotate the hand until you have reached the desired time indication. The GMT hand moves in one-hour increments.
- Pull gently into position **4**. This position is used for handsetting and stopping of the seconds hand. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.

1. Crown screw-down position
2. Manual winding
3. Date/GMT setting
4. Time setting

PLEASE NOTE:

*Date correction should not be carried out between 20.00 hr and 02.00 hr as the watch gearing will already be aligning itself to change the date. The crown should always be pushed in after adjustment, and it is best to do so from position **3** to avoid advancing beyond the desired date. You must always ensure the crown is fully tightened before any use in water.*

Using the GMT hand for travel

Set the time in your new destination by pulling the crown into position **4** and move the hour/ minute hands until they indicate the desired time.

Push crown into position **3** and wind, clockwise, the GMT hand around the 24-hour scale on the bezel until you have the right time at home. E.g. If you're travelling from London at 12.10 to New York, you would turn the hour/minute hands to 7.10 (New York time is five hours behind London) and wind the GMT hand around to the 12.10 position.

Once set, it means that, for example, you can gauge the time to ring your friends and family without waking them in the middle of the night.

PLEASE NOTE:

The table opposite can be used to determine the appropriate time zone when setting the hour/minute hands.

Straps and bracelets

As you would expect, we place as much emphasis on the quality of our straps and bracelets as we do our watches. We only use the finest materials in our straps, with quick-release pins also included for your convenience.

The following guidelines explain how easy it is to use, adjust and replace your Christopher Ward strap or bracelet.

Using the quick-release pins on your strap/bracelet

1. Locate the quick-release pin (or pins) on your strap (A) or bracelet (B). Pull the pin(s) inwards to detach.
2. To reattach your strap (C) or bracelet (D), pull the pin(s) inwards, and align the spring bars so that they click securely into the lug holes on each side.

How to use the micro adjustment on your bracelet

1. Press buttons to release.
2. Pull open the clasp.
3. There are five micro adjustment positions, which allows for a maximum extension of 8.4mm. To extend, pull the lever to unlock and simultaneously pull on the bracelet into the desired position.
4. To shorten, simply push the bracelet back into the clasp.

Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch. For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under.

Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

1 ATM (10 metres)

Safe to wear your watch while washing your hands with tap water

20 ATM (200 metres)

Safe to use while snorkelling in open water

100 ATM (1000 metres)

Professional deep sea diving

3 ATM (30 metres)

Washing your car and/or general hose pipe usage

30 ATM (300 metres)

Ideal for experienced divers and those practising scuba-diving

5 ATM (50 metres)

Water resistant to most household shower units

60 ATM (600 metres)

Professional divers, experiencing prolonged exposure underwater

60|60 Guarantee

Your watch is constructed from the finest components and materials available including one of Switzerland's finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations.

It's for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

60 Day Free Returns

Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days from despatch to return your watch, with free shipping, and receive a replacement or full refund, for which the watch must be in perfect, unworn condition and accompanied by all its original packaging and paperwork.

60 Month Movement Guarantee

Your watch has a top-quality precision engineered Swiss movement – but if it develops a movement fault within 5 years, and has been serviced by us at the recommended interval (within a maximum of 4 years from date of despatch), we will repair it for free under warranty. Not all mechanical problems or quartz battery replacements are

considered movement faults and your watch will need to be sent to us for diagnosis and service history checks, before processing a repair under warranty.

Servicing and Repairs - the Christopher Ward way...

Our innovative approach to service and repair means that having your watch attended to doesn't mean months of waiting followed by an exorbitant bill. We have developed a quick, easy and affordable expert service and repairs process that doesn't cost the earth and has the watch back where it belongs – on your wrist – in reasonable time.

We recommend you service your watch at intervals of 3-4 years to keep it in peak condition and to maintain your **60 month guarantee**. If your watch develops an issue within 60 months of despatch, we will first check its service history before progressing a repair. If you have not had your watch serviced at the recommended interval, we will not cover the cost of the repair under warranty, and will recommend a maintenance service in addition to any repair work due.

PLEASE NOTE:

The 60|60 Guarantee does not cover accidental damage. Any service or repair by a third party retailer will void your 60|60 Guarantee. For more details, please visit our website.

Keeping in touch with Christopher Ward

From small beginnings just 18 years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following and can justifiably claim to manufacture the most affordable luxury watches in the world. For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as smart as the watches themselves. The very open approach of the business sees Mike and Peter, as well as the rest of the team, spending lots of time communicating

personally with customers – listening to feedback which helps us continually improve as we grow. As the owner of a Christopher Ward watch, if you ever need to get hold of us we are at your service. There is always something new on our website, across our social media communities and on the Christopher Ward Forum – informative and fun, these are the best places to join the conversation about the latest new releases, news and offers in the world of Christopher Ward.
