C65 Trident Diver
Owner’s handbook
Time on your side...

Your Christopher Ward watch has been designed and engineered by highly talented craftspeople to ensure not only accurate and precise timekeeping, but also to bring a real pride of ownership that only luxury items of the highest quality can ever hope to deliver.

You have made an investment, a good one, and the aim of this handbook is to help you make the most of that investment during what I hope will be a lifetime of ownership.
In today’s digital world, it’s somehow reassuring to revisit the old school charms of analogue every so often.

In an era where people listen to vinyl records on state of the art digital sound systems, the C65 Trident Diver isn’t just proof that the old and new can co-exist; this is a watch that takes the strengths of each, and then emphasises them further.

Not only blending dive and dress elements, but fusing vintage capabilities with modern engineering, the C65 Trident Diver is the watch Christopher Ward would have made if we had existed back in 1965. From the matte black dial, to its Old Radium-filled indexes, numerals and hands (baton shaped, of course), the Trident Diver is a watch whose design sits comfortably amongst the many famous divers of the ’60s period.

This vintage influence extends to its case – like many divers before it, sized at the sweet spot of 41mm – and the presence of a glassbox sapphire crystal. Reflecting the movements used at the time, the Trident Diver also features a hand-wound mechanical calibre – in this case, the Swiss-made Sellita SW210.

The C65 Trident Diver: the essence of analogue, captured through the prism of the modern day.
Technical information

Features
- Swiss made
- 19 jewel hand-wound movement
- 42 hour power reserve
- Christopher Ward ‘Colimacone’ finish on movement
- Twin flags debossed at 12 o’clock
- Brushed and polished marine-grade stainless steel case
- Push-in crown stamped with twin flag motif
- Unidirectional aluminium bezel
- “Glass box” sapphire crystal
- Matte finish dial
- Old Radium SuperLumiNova® indexes and hands
- Signature Trident counter-balance on seconds hand
- High Definition “Trident” motif screw-down backplate
- Unique engraved serial number
- Luxurious presentation case and owner’s handbook

How to operate your C65 Trident Diver

Setting the time/date

1. Manual winding
2. Time setting
How to operate your C65 Trident Diver

The crown should sit flush to the case (position 1) in order to maintain water resistance.

- To re-power the watch after a period of non-use, simply wind the crown in a clockwise direction until you begin to feel a resistance. Your C65 Trident Diver has a maximum power reserve of 42 hours when fully wound.
- To set the time pull out the crown gently into position 2. This position is used for handsetting and stopping of the second hand. Turn the crown until you reach the correct time e.g. 10.08 hr. For precise time setting it is recommended you pass beyond the desired minute and to set the hand backwards.

PLEASE NOTE: As this watch uses a manually wound mechanical movement, take care not to overwind the crown past the point of resistance as it will damage the movement.
The bezel

If using the bezel for a dive and let’s say the recognised maximum “no-stop time” is 55 minutes, then in this example (shown left) the time at the surface immediately before the dive is 10.08am.

However the bezel marker is at the 12.00 hr position.

- Move the bezel marker anti-clockwise so that it aligns with the 8 minute position.
- You can now read that the 55 minute no decompression limit will occur at 3 minutes past the next hour.

PLEASE NOTE: It is always useful and best practice to make a note on a dive slate before entering the water and to carry a set of dive tables should the dive plan change during the course of a dive. A safety stop for 3 to 5 minutes at 15ft is recommended at the end of all dives. A safety stop for 3 minutes at 15ft is required any time you come within 3 pressure groups of a no decompression limit, and for any dive to a depth of 100ft or deeper.
Straps and bracelets

As you would expect, we place as much emphasis on the quality of our straps and bracelets as we do our watches. We only use the finest metals in the construction of our bracelets, all of which are precision engineered for durability, efficiency and comfort. The following guidelines explain how easy it is to use and adjust your Christopher Ward bracelet.

1. Press buttons to release.

2. Pull open the clasp.

3. There are five micro-adjustment positions, which allow for a maximum extension of 8.4mm. To extend, pull the lever to unlock and simultaneously pull on the bracelet into the desired position.

4. To shorten, simply push the bracelet back into the clasp.
Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch.

For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under. Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

1 ATM (10 metres)
Safe to wear your watch while washing your hands with tap water.

3 ATM (30 metres)
Washing your car and/or general hose pipe usage.

5 ATM (50 metres)
Water resistant to most household shower units.

15 ATM (150 metres)
Safe to use while snorkelling in open water.

30 ATM (300 metres)
Ideal for experienced divers and those practising scuba-diving.

60 ATM (600 metres)
Professional divers, experiencing prolonged exposure underwater.

100 ATM (1000 metres)
Professional deep sea diving.
Our watch care programme

Your watch is constructed from the finest components and materials available including one of Switzerland’s finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations. It’s for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

60|60 Guarantee

1. 60 day free returns
Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days to return your watch, absolutely free of charge, and receive a replacement or full refund by return – so long as it has not been worn and is returned in perfect condition.

2. 60 month movement guarantee
Your watch, at its heart, has a top quality precision engineered Swiss movement – so it’s very unlikely to give you problems with the minimum amount of care and attention, including a regular service. We recommend you return your watch to us every 3/4 years for a service, so our expert technicians can keep your fine timepiece in peak condition.

Servicing and repairs, the Christopher Ward way...

Our innovative approach to servicing and repairing your Christopher Ward watch means that having your watch serviced or repaired doesn’t mean many months of waiting followed by an exorbitant bill – which is more or less the experience guaranteed by every other luxury watch brand. We have developed an easy, quick and affordable expert service and repairs programme that doesn’t cost the earth and has your watch back where it belongs – on your wrist – in double-quick time.

Visit our website for more details about our 60|60 Guarantee and Service and Repair Programme.
Keeping in touch with Christopher Ward

From small beginnings just a few short years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following for his eponymous watch brand and can justifiably claim to manufacture the most affordable luxury watches in the world.

For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as attractive as the watches themselves, as is the very open approach of the business which means that Chris and the team spend a lot of time communicating personally with our customers – many of whom have become friends.

As the owner of a Christopher Ward watch, if ever you need to get hold of us we are at your service. We have listed some useful contact details on the back cover.

There is also always something new going on at our website at www.christopherward.co.uk and, if you haven’t already discovered the independent forum dedicated to our brand at www.christopherwardforum.com we would recommend a visit. Informative and fun, it’s a great place to hear the unexpurgated view of Christopher Ward.
