

C1 Morgan Chronometer Collection

Owner's Handbook

Time on your side

Your Christopher Ward watch has been designed in Britain and engineered in Switzerland by highly talented craftspeople. This ensures not only accurate and precise timekeeping, but also brings a real pride of ownership that only watches of the highest quality standards can hope to deliver.

You have made an investment, a good one, and the aim of this manual is to help you make the most of that investment in what we hope will be a lifetime of ownership.

Chris, Mike and Peter
(Co-founders)

The C1 Morgan Chronometer Collection

Exclusively designed for Morgan owners past and present, Christopher Ward's three-piece Chronometer Collection pays homage to Morgan's most iconic cars – the 3 Wheeler, Classic and Aero 8.

The collection marries Morgan's engineering and design prowess with our own, having been collaboratively created by our Head of Product Design, Adrian Buchmann, and Morgan's Head of Design, Jonathan Wells.

Each of the three bespoke watches in the C1 Morgan Chronometer Collection has at heart a custom-made version of Christopher Ward's in-house movement, Calibre SH21, hand-built by watchmakers at our atelier in Biel, Switzerland.

C1 Morgan 3 Wheeler Chronometer

Housed in a dynamic and sleek Grand Malvern case, the C1 Morgan 3 Wheeler Chronometer offers a number of visible parallels to the Morgan 3 Wheeler motorcar. It has been designed to echo the same aviation era that inspired the 1909 original, whilst also referencing the 21st century technology present in its modern iterations.

C1 Morgan Classic Chronometer

Encapsulating the unique and timeless charm of the Morgan Classic, this timepiece has been sculpted with the car's flowing design in mind. The C1 case lines capture the light perfectly, enhancing the understated elegance of the dial and hands. The bespoke finish to our award-winning movement, Calibre SH21, makes this a worthy addition to any Morgan owner's watch collection.

C1 Morgan Aero 8 Chronometer

A car as exciting as the Aero 8 demands an equally exciting timepiece be worn by its owner. The C1 Morgan Aero 8 Chronometer perfectly captures the supercar characteristics of the Aero 8 and has a bespoke version of our award winning in-house chronometer, Calibre SH21, at its heart.

C1 Morgan 3 Wheeler Chronometer – Features and Technical

- Swiss made
- In-house 27 jewel Calibre SH21 hand-wound chronometer with small second complication
- 120 hour power reserve
- Sandblasted black PVD finish to movement with unique skeletonised bridge

Lug to lug	48.5mm
Weight	60g
Water resistance	3 ATM (30 metres)
Vibrations	28,800 per hour (4Hz)
Timing tolerance	-4/+6 seconds per day
Strap width	20mm

Setting the time and date

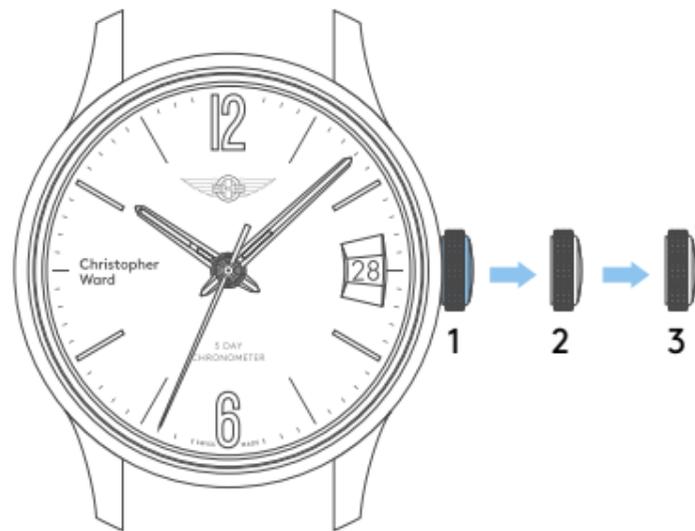

C1 Morgan 3 Wheeler/ Aero 8 Chronometer

- The crown should sit flush to the case (position **1**) in order to maintain water resistance. Position 1 is also for winding in power. Wind in a clockwise direction to re-power the watch. Your C1 Morgan 3 Wheeler/Aero 8 Chronometer has a maximum power reserve of 120 hours when fully wound.
- For setting the time pull gently into position **2** and turn clockwise to advance the time. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.
- Push the crown back to position **1**.

How to operate your C1 Morgan Chronometer

C1 Morgan Classic Chronometer

- Position **1** is for winding in power. Wind in a clockwise direction to re-power the watch. Your C1 Classic Morgan Chronometer has a maximum power reserve of 120 hours when fully wound.
- For rapid date correction pull gently into position **2** and turn in an anti-clockwise direction. *PLEASE NOTE: Date correction should not be carried out between 20.00 hr and 02.00 hr as the watch gearing will already be aligning itself to change the date. The crown should always be pushed in after adjustment, and it is best to do so from position 3 to avoid advancing beyond the desired date.*

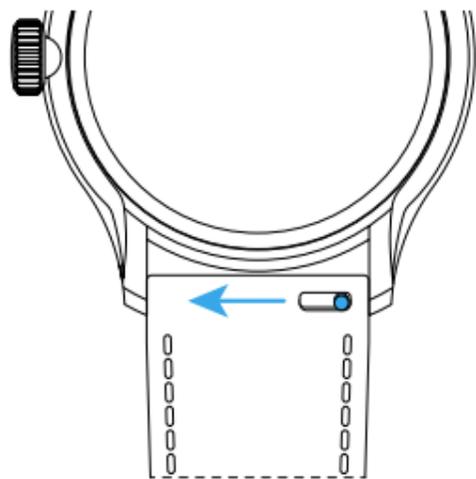

- For setting the time pull gently into position **3** and turn clockwise to advance the time. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.
- Push the crown back to position **1**. The crown should sit flush to the case in order to maintain water resistance.

Straps

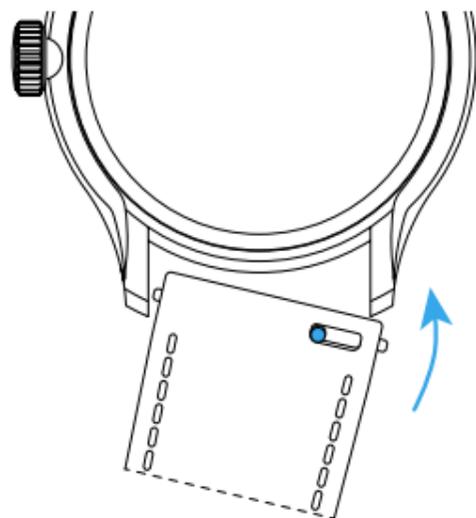

As you would expect, we place as much emphasis on the quality of our straps as we do our watches. We only use the finest materials in our straps, with quick-release pins also included for your convenience.

The following guidelines explain how easy it is to use, adjust and replace your Christopher Ward strap.

Using the quick-release pins on your strap

1. Locate the quick-release pin on your strap. Pull the pin to the side to detach your strap.

2. To reattach your strap, align the pins to the lug holes and click the strap into position. Repeat for the other side.

Water resistance

Although your watch has been through vigorous static pressure testing, it is worth remembering that there are many variables that can affect the water resistance of your watch. For instance, arm movements during swimming and the sudden impact of diving and water sports will drastically increase the pressure the watch is under.

Wearing your watch in the bath, shower, or sauna can also have an effect as a rapid increase in temperature can cause seals to expand and in extreme cases, malfunction or create condensation.

For these reasons, the water resistance rating of your watch (as shown) should only ever be considered a guideline and we strongly recommend they are always adhered to.

1 ATM (10 metres)

Safe to wear your watch while washing your hands with tap water

15 ATM (150 metres)

Safe to use while snorkelling in open water

100 ATM (1000 metres)

Professional deep sea diving

3 ATM (30 metres)

Washing your car and/or general hose pipe usage

30 ATM (300 metres)

Ideal for experienced divers and those practising scuba-diving

5 ATM (50 metres)

Water resistant to most household shower units

60 ATM (600 metres)

Professional divers, experiencing prolonged exposure underwater

60|60 Guarantee

Your watch is constructed from the finest components and materials available including one of Switzerland's finest mechanical movements. As with all watches of this quality, with the right care and attention, your new Christopher Ward watch has the potential to become an heirloom piece giving further joy to future generations.

It's for this reason we have created our industry leading approach to after-sales care, starting with our famous 60|60 Guarantee which remains the most comprehensive guarantee in the world of watchmaking.

60 Day Free Returns

Our success depends on you being completely happy with your new Christopher Ward watch. You have up to 60 days from despatch to return your watch, with free shipping, and receive a replacement or full refund, for which the watch must be in perfect, unworn condition and accompanied by all its original packaging and paperwork.

60 Month Movement Guarantee

Your watch has a top-quality precision engineered Swiss movement – but if it develops a movement fault within 5 years, and has been serviced by us at the recommended interval (within a maximum of 4 years from date of despatch), we will repair it for free under warranty. Not all mechanical problems or quartz battery replacements are

considered movement faults and your watch will need to be sent to us for diagnosis and service history checks, before processing a repair under warranty.

Servicing and Repairs - the Christopher Ward way...

Our innovative approach to service and repair means that having your watch attended to doesn't mean months of waiting followed by an exorbitant bill. We have developed a quick, easy and affordable expert service and repairs process that doesn't cost the earth and has the watch back where it belongs – on your wrist – in reasonable time.

We recommend you service your watch at intervals of 3-4 years to keep it in peak condition and to maintain your **60 month guarantee**. If your watch develops an issue within 60 months of despatch, we will first check its service history before progressing a repair. If you have not had your watch serviced at the recommended interval, we will not cover the cost of the repair under warranty, and will recommend a maintenance service in addition to any repair work due.

Keeping in touch with Christopher Ward

From small beginnings just 15 years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following and can justifiably claim to manufacture the most affordable luxury watches in the world. For many, the philosophy behind the brand, of trying to put luxury watches within the reach of everyone, is as smart as the watches themselves. The very open approach of the business sees Chris, Mike and Peter, as well as the rest of the team, spending lots of time communicating

personally with customers – listening to feedback which helps us continually improve as we grow. As the owner of a Christopher Ward watch, if you ever need to get hold of us we are at your service. There is always something new on our website, across our social media communities and on the Christopher Ward Forum – informative and fun, these are the best places to join the conversation about the latest new releases, news and offers in the world of Christopher Ward.
